LAPORAN PEMROGRAMAN WEB

AKTIVITAS MANDIRI 3 - Membuat Layout Master & Halaman-Halaman

1. Buat layout master: resources/views/layouts/app.blade.php dengan navbar, main content area (@yield('content')), dan footer

```
PeduliKita_TM > resources > views > layouts > app.blade.php > ...
1 <!DOCTYPE html>
2 <html lang="id">
3 <head>
4 <meta charset="UTF-8" />
5 <meta name="viewport" content="width=device-width, initial-scale=1.0" />
6 <title>PeduliKita - Sistem Informasi Pengelolaan Donasi</title>
7 <link rel="stylesheet" href="{{ asset('css/style.css') }}" />
8 @stack('styles')
9 </head>
10 <body>
11
12 {{-- Flash Message --}}
13 @if(session('success'))
14 <div class="flash-success">
15     {{ session('success') }}
16 </div>
17 @endif
18
19 {{-- Navbar --}}
20 @include('partials.navbar')
21
22 {{-- Konten Halaman --}}
23 @yield('content')
24
25 {{-- Footer --}}
26 @include('partials.footer')
27
28 <script src="{{ asset('js/script.js') }}"></script>
29 @stack('scripts')
30
31 </body>
32 </html>
```

2. Buat partial: resources/views/partials/navbar.blade.php dan sisipkan dengan @include di layout

```
PeduliKita_TM > resources > views > partials > navbar.blade.php > ...
1 <nav class="navbar">
2 <div class="navbar-brand">
3 
4 <span class="navbar-judul">PeduliKita</span>
5 </div>
6 <div class="navbar-menu">
7 <a href="{{ route('dashboard') }}" class="{{ request()->routeIs('dashboard') ? 'active' : '' }}">Dashboard</a>
8 <a href="{{ route('tentang') }}" class="{{ request()->routeIs('tentang') ? 'active' : '' }}">Tentang</a>
9 <a href="{{ route('kontak') }}" class="{{ request()->routeIs('kontak') ? 'active' : '' }}">Kontak</a>
10 <a href="#">Program Donasi</a>
11 <a href="#">Donatur</a>
12 <a href="#">Laporan</a>
13 </div>
14 </nav>
```

3. Buat halaman dashboard: resources/views/dashboard.blade.php yang @extends(['layouts.app'](<http://layouts.app/>))

```

PeduliKita_TM > resources > views > dashboard.blade.php > script
1  @extends('layouts.app')
2
3  @section('content')
4
5      <section class="hero">
6          <header class="hero-konten">
7              <h1>Bersama Kita Bisa Membantu Sesama</h1>
8              <p>Kelola program donasi, data donatur, dan laporan keuangan dari satu tempat.</p>
9              <a href="#" class="hero-btn">Mulai Donasi</a>
10         </header>
11     </section>
12
13     <section class="section-form">
14         <h2 id="form-judul">Tambah Program Donasi</h2>
15         <form class="form-program" id="form-program">
16             <div class="form-row">
17                 <div class="form-grup">
18                     <label for="nama-program">Nama Program <span class="wajib">*</span></label>
19                     <input type="text" id="nama-program" placeholder="Contoh: Bantuan Banjir Cianjur" />
20                     <small class="pesan-error" id="error-nama"></small>
21                 </div>
22                 <div class="form-grup">
23                     <label for="kategori-program">Kategori <span class="wajib">*</span></label>
24                     <select id="kategori-program">
25                         <option value="">-- Pilih Kategori --</option>
26                         <option value="Bencana Alam">Bencana Alam</option>
27                         <option value="Anak Yatim">Anak Yatim</option>
28                         <option value="Pendidikan">Pendidikan</option>
29                         <option value="Masjid">Masjid</option>
30                         <option value="Kesehatan">Kesehatan</option>
31                     </select>
32                     <small class="pesan-error" id="error-kategori"></small>

```

4. Tampilkan flash session message di layout: @if(session('success')) ... @endif

```

15
16     @if(session('success'))
17         <div class="alert-success">
18             {{ session('success') }}
19         </div>
20     @endif
21

```

5. Buat komponen: resources/views/components/stat-card.blade.php (kartu statistik dengan props: judul, nilai, ikon, warna)

```

PeduliKita_TM > resources > views > components > stat-card.blade.php > ...
1  <div class="stat-box" style="border-left: 5px solid {{ $warna }}">
2      <div style="font-size: 20px;">{{ $ikon }}</div>
3      <div class="stat-label">{{ $judul }}</div>
4      <div class="stat-angka">{{ $nilai }}</div>
5  </div>

```

6. Gunakan @forelse di dashboard untuk loop array data dummy (jumlah mahasiswa, mata kuliah, dll)

```

PeduliKita_TM > resources > views > dashboard.blade.php > section.section-form > form#form-program.form-program > div.form-row > div.form-grup
1  @extends('layouts.app')
2
3  @section('content')
4
5      @php
6          $statistik = [
7              ['judul' => 'Total Program', 'nilai' => 4, 'ikon' => '📊', 'warna' => '#be163d'],
8              ['judul' => 'Total Target Dana', 'nilai' => 'Rp 155.000.000', 'ikon' => '💰', 'warna' => '#28a745'],
9              ['judul' => 'Program Aktif', 'nilai' => 4, 'ikon' => '🔥', 'warna' => '#ffc107'],
10             ['judul' => 'Program Mendesak', 'nilai' => 0, 'ikon' => '⚠️', 'warna' => '#dc3545'],
11         ];
12     @endphp
13
14     <!-- HERO -->
15     <section class="hero">
16         <div class="hero-konten">
17             <h1>Bersama Kita Bisa Membantu Sesama</h1>
18             <p>Kelola program donasi, data donatur, dan laporan keuangan dari satu tempat.</p>
19             <a href="#" class="hero-btn">Mulai Donasi</a>
20         </div>
21     </section>
22
23     <section class="section-statistik">
24         @forelse($statistik as $item)
25             <x-stat-card
26                 :judul="$item['judul']"
27                 :nilai="$item['nilai']"
28                 :ikon="$item['ikon']"
29                 :warna="$item['warna']"
30             />
31         @empty
32             <p style="margin:20px;">Data tidak tersedia</p>
33         @endforelse
34     </section>

```

7. Buat halaman 'Tentang' dan 'Kontak' yang @extends layout yang sama

```

PeduliKita_TM > resources > views > tentang.blade.php > ...
1  @extends('layouts.app')
2
3  @section('content')
4
5      <section style="padding: 20px;">
6          <h1>Tentang PeduliKita</h1>
7
8          <p style="margin-top:10px;">
9              PeduliKita adalah sistem informasi pengelolaan donasi berbasis web
10             yang bertujuan untuk memudahkan pengelolaan program donasi,
11             data donatur, serta laporan keuangan secara transparan.
12         </p>
13
14         <p style="margin-top:10px;">
15             Dengan adanya platform ini, diharapkan masyarakat dapat lebih mudah
16             dalam berdonasi dan memantau perkembangan donasi secara real-time.
17         </p>
18     </section>
19
20
21 @endsection

```

```
PeduliKita_TM > resources > views > kontak.blade.php > ...
1  @extends('layouts.app')
2
3  @section('content')
4
5  <section style="padding: 20px;">
6      <h1>Kontak Kami</h1>
7
8      <p style="margin-top:10px;">Silakan hubungi kami melalui:</p>
9
10     <ul style="margin-top:10px;">
11         <li>📍 Alamat: Jl. Kalimantan No. 10, Jember</li>
12         <li>☎️ Telepon: (021) 9876-5432</li>
13         <li>✉️ Email: pedulikita@gmail.com</li>
14     </ul>
15
16 </section>
17
18 @endsection
```

8. Gunakan `@push('scripts')` dan `@stack('scripts')` untuk menambahkan JavaScript spesifik per halaman Tips: Gunakan `@include('partials.nama')` untuk memecah tampilan menjadi komponen kecil yang reusable. Ini membuat kode View lebih mudah dikelola.

```
56  @stack('scripts')
...
138 @push('scripts')
139 <script>
140     console.log("Dashboard loaded");
141
142     document.addEventListener("DOMContentLoaded", function () {
143         console.log("Script khusus dashboard jalan");
144     });
145 </script>
146 @endpush
```

```
21  @push('scripts')
22  <script>
23      console.log("Halaman Tentang aktif");
24  </script>
25  @endpush
```

```
18  @push('scripts')
19  <script>
20  |   console.log("Halaman Kontak aktif");
21  </script>
22  @endpush
```

AKTIVITAS MANDIRI 4 — Migration, Model & Seeder

1. Buat Model dan Migration sekaligus: `php artisan make:model Mahasiswa -m`

```
PS C:\Users\TEC9\OneDrive\Documents\Matkul Perkuliahan\PWEB\Tugas PWEB\PeduliKita_TM> php artisan make:model ProgramDonasi -m
[INFO] Model [C:\Users\TEC9\OneDrive\Documents\Matkul Perkuliahan\PWEB\Tugas PWEB\PeduliKita_TM\app\Models\ProgramDonasi.php] created successfully.
[INFO] Migration [C:\Users\TEC9\OneDrive\Documents\Matkul Perkuliahan\PWEB\Tugas PWEB\PeduliKita_TM\database\Migrations\2026_05_143028_create_program_donasis_table.php] created successfully.
```

2. Edit file migration: tambahkan kolom nim, nama, email, jurusan (enum), ipk (decimal), semester, aktif (boolean), foto (nullable)

```
PeduliKita_TM > database > migrations > 2026_05_143028_create_program_donasis_table.php
1  <?php
2
3  use Illuminate\Database\Migrations\Migration;
4  use Illuminate\Database\Schema\Blueprint;
5  use Illuminate\Support\Facades\Schema;
6
7  return new class extends Migration
8  {
9      /**
10       * Run the migrations.
11       */
12       public function up(): void
13       {
14           Schema::create('program_donasis', function (Blueprint $table) {
15               $table->id();
16               $table->string('nama');
17               $table->enum('kategori', [
18                   'Bencana Alam',
19                   'Anak Yatim',
20                   'Pendidikan',
21                   'Masjid',
22                   'Kesehatan'
23               ]);
24               $table->bigInteger('target');
25               $table->bigInteger('terkumpul')->default(0);
26               $table->date('tanggal_mulai');
27               $table->string('gambar')->nullable();
28               $table->timestamps();
29           });
30       }
31  }
```

3. Jalankan migration: `php artisan migrate` — cek di phpMyAdmin bahwa tabel sudah terbuat

```
PS C:\Users\TEC9\OneDrive\Documents\Matkul Perkuliahan\PWEB\Tugas PWEB\PeduliKita_TM> php artisan migrate
[INFO] Running migrations.
2026_05_143028_create_program_donasis_table ..... 65.10ms DONE
```

4. Edit Model Mahasiswa: isi \$fillable, tambahkan \$casts, dan buat local scope `scopeAktif()`

```
PeduliKita_TM > app > Models > ProgramDonasi.php > ...
1  <?php
2
3  namespace App\Models;
4
5  use Illuminate\Database\Eloquent\Model;
6
7  class ProgramDonasi extends Model
8  {
9      protected $fillable = [
10         'nama',
11         'kategori',
12         'target',
13         'terkumpul',
14         'tanggal_mulai',
15         'gambar',
16     ];
17
18     protected $casts = [
19         'target' => 'integer',
20         'terkumpul' => 'integer',
21         'tanggal_mulai' => 'date',
22     ];
23
24     public function scopeAktif($query)
25     {
26         return $query->whereColumn('terkumpul', '<', 'target');
27     }
28 }
```

5. Buat seeder: php artisan make:seeder MahasiswaSeeder — isi dengan 5-10 data dummy

```
PS C:\Users\TEC9\OneDrive\Documents\Matkul Perkuliahan\PWEB\Tugas PWEB\PeduliKita_TM> php artisan make:seeder ProgramDonasiSeeder
INFO Seeder [C:\Users\TEC9\OneDrive\Documents\Matkul Perkuliahan\PWEB\Tugas PWEB\PeduliKita_TM\database\seeders\ProgramDonasiSeeder.php] created successfully.
```

```
PeduliKita_TM > database > seeders > ProgramDonasiSeeder.php > ProgramDonasiSeeder
1  <?php
2
3  namespace Database\Seeders;
4
5  use Illuminate\Database\Console\Seeds\WithoutModelEvents;
6  use Illuminate\Database\Seeder;
7  use App\Models\ProgramDonasi;
8
9  class ProgramDonasiSeeder extends Seeder
10 {
11     public function run(): void
12     {
13         ProgramDonasi::create([
14             'nama' => 'Bantuan Erupsi Gunung Semeru',
15             'kategori' => 'Bencana Alam',
16             'target' => 50000000,
17             'terkumpul' => 11000000,
18             'tanggal_mulai' => '2026-01-10',
19         ]);
20
21         ProgramDonasi::create([
22             'nama' => 'Beasiswa Anak Yatim 2026',
23             'kategori' => 'Anak Yatim',
24             'target' => 50000000,
25             'terkumpul' => 30000000,
26             'tanggal_mulai' => '2026-01-15',
27         ]);
28
29         ProgramDonasi::create([
30             'nama' => 'Buku untuk Pelosok Negeri',
31             'kategori' => 'Pendidikan',
32             'target' => 30000000,
33             'terkumpul' => 22500000,
34             'tanggal_mulai' => '2026-02-01',
35         ]);
36     }
37 }
```

```

37     ProgramDonasi::create([
38         'nama' => 'Renovasi Masjid Al-Ikhlas',
39         'kategori' => 'Masjid',
40         'target' => 100000000,
41         'terkumpul' => 17500000,
42         'tanggal_mulai' => '2026-02-10',
43     ]);
44
45     ProgramDonasi::create([
46         'nama' => 'Banjir Kalimantan',
47         'kategori' => 'Bencana Alam',
48         'target' => 200000000,
49         'terkumpul' => 27500000,
50         'tanggal_mulai' => '2026-02-10',
51     ]);
52 }
53 }

```

- Daftarkan seeder di DatabaseSeeder.php dan jalankan: php artisan db:seed

```

PeduliKita_TM > database > seeders > DatabaseSeeder.php > ...
1  <?php
2
3  namespace Database\Seeders;
4
5  use App\Models\User;
6  use Illuminate\Database\Console\Seeds\WithoutModelEvents;
7  use Illuminate\Database\Seeder;
8
9  class DatabaseSeeder extends Seeder
10 {
11     use WithoutModelEvents;
12
13     public function run(): void
14     {
15         $this->call(ProgramDonasiSeeder::class);
16     }
17 }

```

```

PS C:\Users\TEC9\OneDrive\Documents\Matkul Perkuliahan\PWEB\Tugas PWEB\PeduliKita_TM> php artisan db:seed
INFO Seeding database.
