## LAPORAN PEMROGRAMAN WEB

### PRAKTIK INDIVIDU — Sistem Pencarian & Notifikasi (100 poin)

1. Buat section yang menampilkan data cuaca kota Surabaya menggunakan API publik <https://wttr.in/Surabaya?format=j1> (gratis, tidak perlu API key). Tampilkan: nama kota, suhu saat ini (dalam °C), dan deskripsi cuaca. Gunakan async/await dan tampilkan loading indicator saat data sedang diambil. Bisa menggunakan api publik yang sesuai proyek masing masing

```
PeduliKita_TM > resources > views > dashboard.blade.php > section.hero > div.hero-konten > a.hero-btn
31 <section class="section-cuaca">
32 <h2>Cuaca Surabaya</h2>
33
34 <div id="cuaca-box">
35 <p id="cuaca-loading">Loading cuaca...</p>
36
37 <div id="cuaca-data" style="display:none;">
38 <p><strong>Kota:</strong> Surabaya</p>
39 <p><strong>Suhu:</strong> <span id="suhu"></span> °C</p>
40 <p><strong>Cuaca:</strong> <span id="deskripsi"></span></p>
41 </div>
42 </div>
43 </section>
```

Cuaca Surabaya  
**Kota:** Surabaya  
**Suhu:** 27 °C  
**Cuaca:** Patchy rain nearby

2. Buat live search yang memiliki form sederhana untuk mencari mahasiswa. Form dikirim via AJAX POST/ GET ke Laravel — halaman tidak boleh reload sama sekali. Setelah berhasil, catatan baru langsung muncul di daftar bawah tanpa refresh. Gunakan CSRF token yang benar.

```
PeduliKita_TM > app > Http > Controllers > ProgramDonasiController.php > {} App\Http\Controllers
9 class ProgramDonasiController extends Controller
93 public function search(Request $request)
94 {
95     $keyword = $request->keyword;
96
97     $programs = ProgramDonasi::where('nama', 'like', "%$keyword%")
98         ->orWhere('kategori', 'like', "%$keyword%")
99         ->get();
100
101     return view('program-donasi.search', compact('programs'));
102 }
103 }
```

```

2 Route::get('/search-program', [ProgramDonasiController::class, 'search']);
3

```

3. Buat navbar untuk mengeset dark mode.
  - a. Tambahkan dark mode ke konfigurasi Tailwind (darkMode: 'class' di [tailwind.config.js](#))

```

PeduliKita_TM > tailwind.config.js > default
1 import defaultTheme from 'tailwindcss/defaultTheme';
2 import forms from '@tailwindcss/forms';
3
4 /** @type {import('tailwindcss').Config} */
5 export default {
6   darkMode: "class",
7   content: [
8     "./vendor/laravel/framework/src/Illuminate/Pagination/resources/views/*.blade.php",
9     "./storage/framework/views/*.php",
10    "./resources/views/**/*.blade.php",
11  ],
12
13   theme: {
14     extend: {
15       fontFamily: {
16         sans: ["Figtree", ...defaultTheme.fontFamily.sans],
17       },
18     },
19   },
20
21   plugins: [forms],
22 };
23

```

- b. Buat helper function JavaScript: setCookie, getCookie, deleteCookie

```

PeduliKita_TM > resources > views > layouts > app.blade.php > html > body > script > getCookie
2 <html lang="en">
24 <body>
30 <script>
32 // SET COOKIE
33 function setCookie(name, value, days) {
34   let expires = "";
35   if (days) {
36     let date = new Date();
37     date.setTime(date.getTime() + (days*24*60*60*1000));
38     expires = "; expires=" + date.toUTCString();
39   }
40   document.cookie = name + "=" + value + expires + "; path=/";
41 }
42
43 // GET COOKIE
44 function getCookie(name) {
45   let nameEQ = name + "=";
46   let ca = document.cookie.split(';');
47   for(let i=0; i < ca.length; i++) {
48     let c = ca[i].trim();
49     if (c.indexOf(nameEQ) === 0) return c.substring(nameEQ.length);
50   }
51   return null;
52 }
53
54 // TOGGLE DARK MODE
55 document.addEventListener("DOMContentLoaded", function () {
56
57   const btn = document.getElementById('toggleDark');
58
59   // load dari cookie
60   if (getCookie('theme') === 'dark') {
61     document.body.classList.add('dark');
62   }
63 }
64

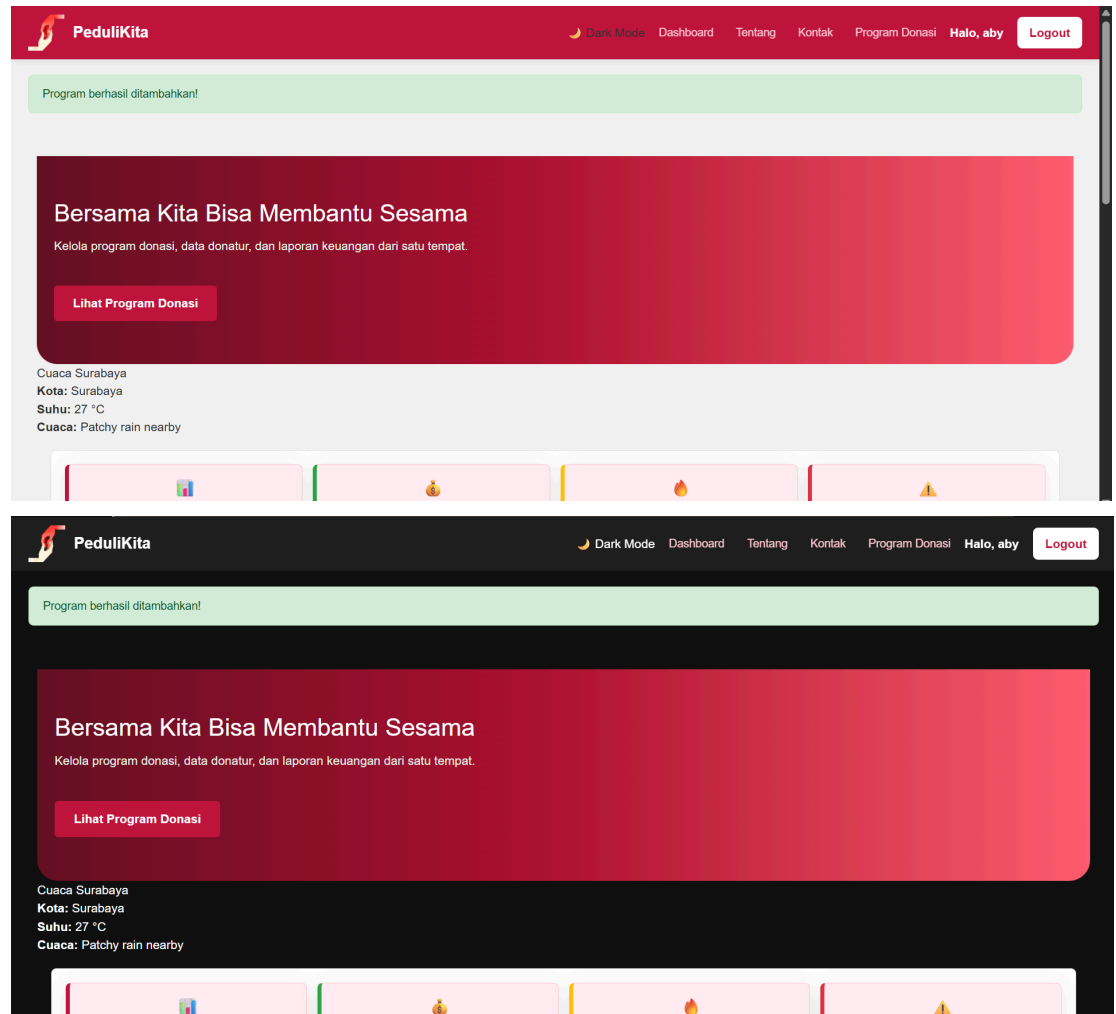

```

- c. Implementasikan toggle dark mode: klik tombol → toggle class 'dark' di HTML → simpan ke cookie

```

PeduliKita_TM > resources > views > partials > navbar.blade.php > nav.navbar > div.navbar-menu > a
1 <nav class="navbar">
15 <div class="navbar-menu">
16 <button id="toggleDark">
17   🌙 Dark Mode
18 </button>

```

- d. Terapkan cookie di awal load (dalam tag script di <head>) untuk mencegah flash of unstyled content

```
PeduliKita_TM > resources > views > layouts > app.blade.php > html > head
1  <!DOCTYPE html>
2  <html lang="en">
3
4  <head>
5      <script>
6          (function() {
7              let theme = document.cookie.match(/theme=([^;]+)/);
8
9              if (theme && theme[1] === 'dark') {
10                 document.documentElement.classList.add('dark');
11             }
12
13             let font = document.cookie.match(/font=([^;]+)/);
14
15             if (font) {
16                 document.documentElement.style.fontSize =
17                     font[1] === 'small' ? '12px' :
18                     font[1] === 'large' ? '20px' : '16px';
19             }
20         })();
21     </script>
```

- e. Buat halaman pengaturan /preferensi dengan form: pilihan tema (light/dark/system), pilihan ukuran font

```
PeduliKita_TM > routes > web.php
9 Route::get('/', [DashboardController::class, 'index'])
12 Route::get('/preferensi', function () {
13     return view('preferensi');
14 });
```

**PeduliKita** Dark Mode Dashboard Tenlang Kontak Program Donasi Halo, aby Logout

Program berhasil ditambahkan!

Pengaturan Preferensi

Tema:

Ukuran Font:

Simpan

f. Simpan form ke cookie via Fetch POST ke endpoint Laravel

```
PeduliKita_TM > resources > views > preferensi.blade.php > ...
34 @push('scripts')
35 <script>
36
37 // helper cookie
38 function setCookie(name, value, days) {
39     let expires = "";
40     if (days) {
41         let date = new Date();
42         date.setTime(date.getTime() + (days*24*60*60*1000));
43         expires = "; expires=" + date.toUTCString();
44     }
45     document.cookie = name + "=" + value + expires + "; path=/";
46 }
47
48 // FETCH KE LARAVEL (INI 3f)
49 document.getElementById('form-preferensi').addEventListener('submit', async function(e) {
50
51     e.preventDefault();
52
53     let theme = document.getElementById('theme').value;
54     let font = document.getElementById('font').value;
55
56     let response = await fetch('/preferensi', {
57         method: 'POST',
58         headers: {
59             'Content-Type': 'application/json',
60             'X-CSRF-TOKEN': document.querySelector('meta[name="csrf-token"]').content
61         },
62         body: JSON.stringify({ theme, font })
63     });
64
65     let data = await response.json();
66
67     // simpan ke cookie
68     setCookie('theme', theme, 7);
69     setCookie('font', font, 7);
70 });
```

g. Laravel Controller: baca cookie dari \$request->cookie(), kembalikan JSON konfirmasi

```
PS C:\Users\TEC9\OneDrive\Documents\Matkul Perkuliahan\PWEB\Tugas PWEB\PeduliKita_TM> php artisan make:controller PreferensiController
INFO Controller [C:\Users\TEC9\OneDrive\Documents\Matkul Perkuliahan\PWEB\Tugas PWEB\PeduliKita_TM\app\Http\Controllers\PreferensiController.php]
created successfully.
```

```
PeduliKita_TM > app > Http > Controllers >  PreferensiController.php > ...
```

```
1  <?php
2
3  namespace App\Http\Controllers;
4
5  use Illuminate\Http\Request;
6
7  class PreferensiController extends Controller
8  {
9      public function simpan(Request $request)
10     {
11         return response()->json([
12             'status' => 'success',
13             'theme' => $request->theme,
14             'font' => $request->font
15         ]);
16     }
17 }
```

```
PeduliKita_TM > routes >  web.php
```

```
16  Route::post('/preferensi', [PreferensiController::class, 'simpan']);
17
```

4. Buat section yang menghitung berapa kali pengguna mengunjungi halaman tersebut menggunakan session Laravel. Tampilkan: jumlah kunjungan, waktu kunjungan pertama, dan waktu kunjungan terakhir. Sediakan tombol "Reset Hitungan" yang menghapus data dari session dan mengulang dari awal. Bisa menggunakan case cart, sesuaikan dengan proyek

Statistik Kunjungan  
Total kunjungan: 6  
Pertama kali: 2026-05-20T17:31:17.134593Z  
Terakhir kunjungan: 2026-05-20 17:37:45  
Reset Hitungan

Statistik Kunjungan  
Total kunjungan: 1  
Pertama kali: 2026-05-20 17:39:35  
Terakhir kunjungan: 2026-05-20 17:39:35  
Reset Hitungan

PeduliKita\_TM > app > Http > Controllers >  DashboardController.php > ...

```
8  class DashboardController extends Controller
9  {
10     public function index()
11     {
12         $kunjungan = session('kunjungan', 0);
13         $pertama = session('pertama');
14         $terakhir = now();
15
16         $kunjungan++;
17
18         if (!$pertama) {
19             $pertama = now();
20         }
21
22         session([
23             'kunjungan' => $kunjungan,
24             'pertama' => $pertama,
25             'terakhir' => $terakhir
26         ]);
27
28         return view('dashboard', compact('kunjungan', 'pertama', 'terakhir'));
29     }
30 }
```

PeduliKita\_TM > routes >  web.php

```
26  Route::post('/reset-kunjungan', function () {
27
28      session()->forget(['kunjungan', 'pertama', 'terakhir']);
29
30      return redirect()->back();
31
32  }->name('reset.kunjungan');
```
