AKTIVITAS MANDIRI 5 — CRUD

Lengkap Mahasiswa

1. Buat Resource Controller: `php artisan make:controller MahasiswaController --resource --model=Mahasiswa`

```
PS C:\Users\TEC9\OneDrive\Documents\Matkul Perkuliahan\PEWEB\Tugas PWEB\PeduliKita_TM> php artisan make:controller MahasiswaController --resource
e --model=Mahasiswa

INFO Controller [C:\Users\TEC9\OneDrive\Documents\Matkul Perkuliahan\PEWEB\Tugas PWEB\PeduliKita_TM\app\Http\Controllers\MahasiswaController
.php] created successfully.
```

```
PeduliKita_TM > database > migrations > 2026_05_08_150155_create_donasis_table.php

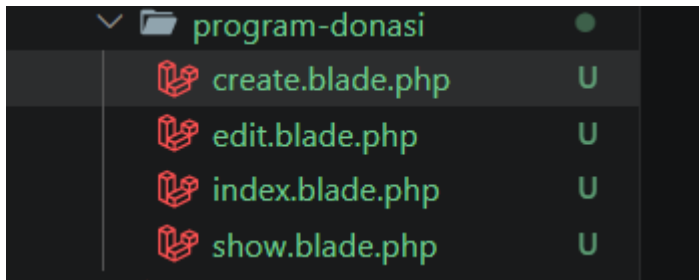

3 use Illuminate\Database\Migrations\Migration;
4 use Illuminate\Database\Schema\Blueprint;
5 use Illuminate\Support\Facades\Schema;
6
7 return new class extends Migration
8 {
9     public function up(): void
10     {
11         Schema::create('donasis', function (Blueprint $table) {
12             $table->id();
13
14             $table->foreignId('program_donasi_id')->constrained()->cascadeOnDelete();
15
16             $table->foreignId('donatur_id')->constrained()->cascadeOnDelete();
17
18             $table->bigInteger('jumlah');
19
20             $table->timestamps();
21         });
22     }
23 }
```

2. Daftarkan di routes/web.php: `Route::resource('mahasiswa', MahasiswaController::class)`

```
PeduliKita_TM > routes > web.php

1 <?php
2
3 use Illuminate\Support\Facades\Route;
4 use App\Http\Controllers\DashboardController;
5 use App\Http\Controllers\ProgramDonasiController;
6
7 Route::get('/', [DashboardController::class, 'index']->name('dashboard'));
8
9 Route::get('/dashboard', [DashboardController::class, 'index']->name('dashboard'));
10 Route::resource('program-donasi', ProgramDonasiController::class);
11
```

3. Buat semua view: mahasiswa/index.blade.php (tabel + pagination), create.blade.php (form), edit.blade.php (form pre-filled), show.blade.php (detail)

4. Implementasi method index() — ambil semua mahasiswa dengan paginate(10) dan tampilkan ke view

```
PeduliKita_TM > app > Http > Controllers > ProgramDonasiController.php > ...
1  <?php
2
3  namespace App\Http\Controllers;
4
5  use Illuminate\Http\Request;
6  use App\Models\ProgramDonasi;
7
8  class ProgramDonasiController extends Controller
9  {
10     public function index()
11     {
12         $programs = ProgramDonasi::latest()->paginate(10);
13
14         return view('program-donasi.index', compact('programs'));
15     }
16 }
17
```

The image displays two screenshots of a web application interface. The top screenshot shows the registration page at <http://127.0.0.1:8000/register>. It features a logo at the top center, followed by a form with fields for Name (filled with 'Aby'), Email (filled with 'aby@gmail.com'), Password (masked with dots), and Confirm Password (masked with dots). Below the form are links for 'Already registered?' and a 'REGISTER' button. The bottom screenshot shows the login page at <http://127.0.0.1:8000/login>. Below the form are a 'Remember me' checkbox, a link for 'Forgot your password?', and a 'LOG IN' button.

5. Amankan semua route mahasiswa dengan middleware auth:
`Route::middleware('auth')->resource('mahasiswa', MahasiswaController::class)`

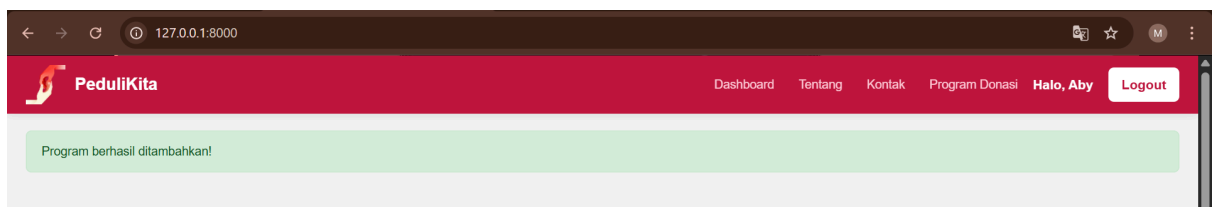

```
PeduliKita_TM > routes > web.php
19 Route::middleware('auth')->group(function () {
20
21     Route::resource(
22         'program-donasi',

31
32     Route::delete('/profile', [ProfileController::class, 'destroy'])
33         ->name('profile.destroy');
34 });
```

6. Coba akses /mahasiswa tanpa login — pastikan diredirect ke halaman login

7. Tambahkan nama user di navbar: `{{ auth()->user()->name }}`

```
PeduliKita_TM > resources > views > partials > navbar.blade.php > nav.navbar > div.navbar-menu > a.btn-auth
1  <nav class="navbar">
15  <div class="navbar-menu">
